NATIONAL SENIOR CERTIFICATE NASIONALE SENIOR SERTIFIKAAT

GRADE/GRAAD 12

MATHEMATICS P3/WISKUNDE V3

**NOVEMBER 2013** 

**MEMORANDUM** 

MARKS/PUNTE: 100

This memorandum consists of 14 pages. *Hierdie memorandum bestaan uit 14 bladsye*.

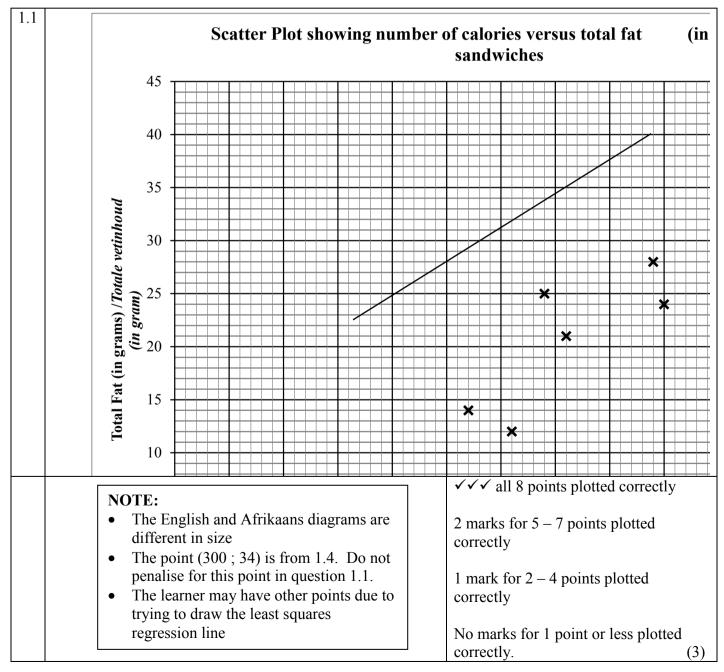

#### NOTE:

- If a candidate answered a question TWICE, mark only the first attempt.
- If a candidate crossed out an attempt of a question and did not redo the question, mark the crossed-out question.
- Consistent accuracy applies in ALL aspects of the marking memorandum.

#### LET WEL:

- As 'n kandidaat 'n vraag TWEE keer beantwoord het, merk slegs die eerste poging.
- As 'n kandidaat 'n antwoord deurgehaal en nie oorgedoen het nie, merk die deurgehaalde antwoord.
- Volgehoue akkuraatheid is DEURGAANS in ALLE aspekte van die memorandum van toepassing.

Calories	270	310	340	360	440	450	580	620
Total fat (in grams)	14	12	25	21	28	24	32	43

			T
1.2	a = -5.62 (-5.62181859) b = 0.07 (0.072396008) $\hat{y} = -5.62 + 0.07x$	NOTE: Penalty 1 for rounding in question 1.2.	✓ a  or  b $ ✓ b  or  a $ $ ✓ equation $ (4)
1.3	Drawn on the scatter plot		✓ graph passing close to (350; 19) / (300; 16) / (650; 40) ✓ gradient (graph close to (450; 26)) (2)
1.4	The sandwich from Pinky's restaur. In terms of the model, the sandwich fat should provide 300 calories. The sandwich from Pinky's restaurant is expected model and is therefore an Die toebroodjie van Pinky se restaurant van 30 gram. In terme van die model 16 gram, 300 kalorieë verskaf. Dit	n with 16 grams of total ais suggests that the s far removed from outlier.  urant het 'n vetinhoud sel, sal 'n toebroodjie van	<ul> <li>✓ comparison with model (literal or graphical (i.e. plotting the point))</li> <li>✓ outlier / explain this concept</li> <li>✓ vergelyking met model</li> </ul>
	toebroodjie van Pinky se restauran model verwyder is en is dus 'n uitsk	t ver van die verwagte	✓ uitskieter (2)
1.5	r = 0.92 (0.92099548)		✓✓ answer (2)
1.6	There is a very strong, positive comnumber of calories and the total fat sandwich with higher number of calories and total fat content.  Daar is 'n baie sterk positiewe korn kalorieë en die totale vetinhoud in a Toebroodjie met 'n hoë aantal kalo	in the sandwiches. A lories will have a higher relasie tussen die aantal die toebroodjies. 'n	✓ strong / reference to correlation ✓ positive / increasing / explain the concept of increasing  (2)
	vetinhoud hê.		[15]

# NSC/*NSS* – Memorandum

2.1	Random Sampling Method	✓ answer
	Ewekansige Steekproef Metode / Willekeurig / Onwillekeurig/ Lukraak	(1)
2.2	Although the sample is selected randomly, there exists a chance that this could be a homogenous sample.  For example the sample could contain many learners from one grade and few from other grades.  The sample could contain many more learners of a particular gender and few from the other.	✓ homogenous sample / the sample will be biased towards one characteristic (1)
	Al is die steekproef ewekansig gedoen bestaan die kans wel dat die steekproef homogeen kan wees. Ter voorbeeld, die steekproef kan baie leerders van een graad insluit en min van ander grade.  Die steekproef kan ook meer leerders van 'n bepaalde geslag insluit en min van die ander geslag.	✓ homogene steekproef (1)
2.3	The sampling should have equal representation across various criteria. In this case the criteria will possibly be grade and gender. There should possibly be a selection of 8 boys and 8 girls randomly from each grade for the sample.  Gelyke verteenwoordiging van verskillende kategorieë moet in die steekproef teenwoordig wees. In die geval sal die kategorieë graad en geslag wees. Daar behoort moontlik 8 seuns en 8 meisies van elke graad ewekansig gekies te word vir die steekproef.	<ul> <li>✓ equal representation of grade</li> <li>✓ equal representation of gender</li> <li>any explanation that indicates representing the school for equally Ideas to consider: gender; race; grade</li> <li>(2)</li> </ul>
		[4]

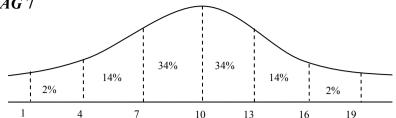

3.1	Disagree. The events A and B have an intersection and are therefore not mutually exclusive. $P(A \text{ and } B) \neq 0$	✓ disagree ✓ intersection between events exist
	Verskil. Die gebeurtenisse $A$ en $B$ sny mekaar en is daarom nie onderling uitsluitend nie. $P(A \text{ en } B) \neq 0$	(2)
	OR Disagree $P(A) + P(B) + P(C) = 1,07$ Since the sum of the probabilities of the events is greater than 1, these events must have an intersection. Hence A and B are not mutually exclusive events.	✓ disagree  ✓ intersection between events exist  (2)
	Verskil $P(A) + P(B) + P(C) = 1,07$ Siende dat die som van die waarskynlikhede van al die gebeurtenisse groter as 1 is, moet daar 'n snyding wees. Vervolgens sal A en B nie onderling uitsluitend wees nie.	
3.2.1	P(B  or  C) = P(B) + P(C) = 0,3 + 0,32 = 0,62	✓ substitution into correct formula ✓ answer (2)
	$ \begin{array}{c c} A & B & C \\ \hline 0,315 & 0,165 & 0,165 \end{array} $	
	P(A and B) = P(A).P(B) = $0.45 \times 0.3$ = $0.135$ P(B or C) = $0.135 + 0.165 + 0.32$ = $0.62$	✓ substitution into correct formula ✓ answer (2)
3.2.2	P(A and B) = P(A).P(B) = $0.45 \times 0.3$ = $0.135$ P(A or B) = P(A) + P(B) – P(A and B) = $0.45 + 0.3 - 0.135$ = $0.615$ = $0.62$	✓ 0,135 ✓ answer (2)
		[6]

4.1	The word "EQUATIONS" ha	as 9 letters	
	Number of different 5 letter c = $9 \times 8 \times 7 \times 6 \times 5$ = $15120$	✓ multiplication rule in five "slots" ✓ answer	
	OR		(2)
	Number of different 5 letter c	eodes	
	$= \frac{9!}{4!} = 15120$	NOTE: Answer only: 2/2 marks	✓ multiplication rule in five "slots" ✓ answer
	ACCEPT: Number of different 5 letter $c$ = $9^5$	eodes (this is with repetition)	(2)
	= 59049		
4.2	4 consonants 5 vowels		
	Number of different codes = $5 \times 5 \times 4 \times 3 \times 2 \times 1$ = $600$	<b>OR</b> Number of different codes $= 5 \times 5!$ $= 600$	✓ 5 ✓ 5! ✓ answer  (3)

5.1	The heights / frequency of the histogram for the interval $500 \le x < 700$ are incorrect.  Die hoogtes / frekwensies van die histogram vir die wydte $500 \le x < 700$ is nie korrek nie.	✓✓ heights / frequency incorrect (2)
	OR The histogram has not taken into account the width of the classes. The first class is double the width of the other classes. The area of the rectangles for the class $500 \le x < 700$ is double what it should be.	✓✓ width not taken into account (2)
	Die histogram het nie die wydte van die klasse in ag geneem nie. Die eerste klas is dubbel die wydte van die ander klasse. Die oppervlakte van die reghoeke vir die klas $500 \le x < 700$ , is dubbel wat dit behoort te wees.	
	OR Area of each rectangle is not in the same ratio as the frequencies.  Die area van elke reghoek is nie in dieselfde verhouding as die frekwensies nie.	✓✓ area of rectangle not in same ratio as frequencies (2)
5.2	The interval $500 \le x < 700$ should have a frequency of 5.  Die frekwensie behoort 5 vir die klas $500 \le x < 700$ te wees.	✓ frequency should be 5 ✓ keep interval the same (2) [4]

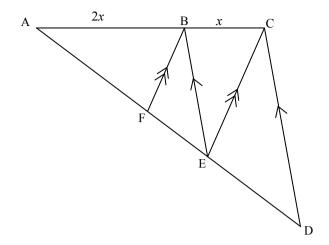

6.1		
	A/M 670 100 470 80 70 P/O	(6)
6.2	x + 80 + 40 + 70 + 470 + 100 + 670 = 2140	✓ sum of values in Venn
	x + 1430 = 2140	diagram = 2140
	x = 710 Number said lack of parental support $= 710 + 80 + 40 + 70$ $= 900$	✓ answer for x (must not be negative) ✓ answer (3)
6.3	P(exactly 2 problems)	
	$=\frac{80+100+70}{}$	$\checkmark 80+100+70=250$
	2140	<b>✓</b> 2140
	$=\frac{250}{2140}$	
	$=\frac{25}{}$	
	214	✓ answer
	= 0,12 (0,1168224299)	(3) [12]

	1 4 7 10 13 16	19
7.1.1	16 = 10 + 2(3)	✓ 2 std deviations from mean.
	P(More than 16 point) = 2%	✓ 2%
		(2)
7.1.2	$\frac{84}{100} \times 200 = 168 \text{ learners}$ <b>NOTE:</b>	✓ 84%
	100 Lif 16% is used: max 1 mark	✓ answer
		(2)
7.2	Mathematics test $\bar{x} + \sigma = 55 + 15$	, - <b>5</b> 0
	= 70	$\sqrt{x} + \sigma = 70$
	English test $\bar{x} + \sigma = 55 + (7,5)$	
	= 62,5	$\sqrt{x} + \sigma = 62.5$
	$\overline{x} + 2\sigma = 55 + 2(7,5)$	
	= 70	
	Matilda scored better relative to her classmates in the English	✓ answer
	test as she scored between the 1 <sup>st</sup> and the 2 <sup>nd</sup> deviation from	(3)
	the mean.	
	Matilda het beter as die res van haar klasmaats in die Engelse	
	toets gevaar aangesien haar punt tussen die 1 <sup>ste</sup> en die 2 <sup>de</sup>	
	afwyking van die gemiddeld was.	
	OR	
	A mark of 67% in Maths lies within 1 standard deviation to	
	the right of the mean. Hence it is approximately at the 76 <sup>th</sup>	✓ 76 <sup>th</sup> percentile
	percentile of distribution of the Maths marks.	70 percentile
	A mark of 67% in English lies between 1 and 2 standard	
	deviations to the right of the mean. Hence it is approximately	✓ 95 <sup>th</sup> percentile
	at the 95 <sup>th</sup> percentile of distribution of the English marks.	r
	Matilda scored better relative to her classmates in the English	
	test as she has outperformed more learners in English than in	✓ answer
	Maths.	(3)
	'n Punt van 67% in Wiskunde lê binne 1 standaardafwyking	
	aan die regterkant van die gemiddeld. Vervolgens is dit	
	ongeveer by die 76 ste persentiel van die verspreiding van die Wisk punte. 'n Punt van 67% in Engels lê tussen die 1ste en	
	2de standaardafwyking regs van die gemiddeld. Vervolgens is	
	die Engelse punt ongeveer by die 95 ste persentiel van die	
	verspreiding van die Engelse punte. Matilda het relatief tot	
	haar klasmaats beter in die Engelse toets gevaar. Sy het beter	
	gevaar as meer van die leerders in Engels as in Wiskunde.	(a)
		[7]

8.1	$T_1 = -5$		( = 2	
	$T_2 = -5 + 3(2) - 4 = -3$		$\checkmark T_2 = -3$	
	$T_3 = -3 + 3(3) - 4 = 2$		$\checkmark T_3 = 2$	
	$T_4 = 2 + 3(4) - 4 = 10$		$\checkmark T_4 = 10$	(2)
8.2	$T_{30} = T_1 + S_{29 \text{ of the linear pattern}}$		$\checkmark T_1 + S_{29 \text{ of the linear pattern}}$	(3)
